

Atlantis under new point of view

A text of a world cultural heritage, according to opinion of the author, is based so far on a not recognized Atlantis Epos, really not understood for 220 years. A completely new point of view about Atlantis results from the realizations won. And so numerous old texts, stone paintings, myths and sacred places, even exhibits in museums, which were not understandable so far, can suddenly be interpreted meaningful. As is the case for an important keyword found out in a cross word - quasi like a puzzle - free fields are automatically filled in and are telling of the most dramatic time of mankind history.

With this new view of Atlantis, logical explanations offer themselves to mankind history, surprisingly and for many further mysteries. Where did Atlantis really lie? How did Atlantis really go down? What do Schiller, Troy, Babylon, Uruk, Crete, Iceland, Brunhild, Gilgamesh, Siegfried, King Gunter, Thor, Heracles, Krishna, Enoch, Abraham, Lot, Moses, Joseph, Jesus of Nazareth, the Chosen People, the Olympic Rings, guardian angels, fireworks, witches and the devil as well as the Great Biblical Flood have to do with Atlantis?

All these questions and still many more this special books answers. It also names the acting persons, their requiring tasks and the order giving persons behind, both while the fall takes place and for the time thereafter. Surprisingly many mysteries of the past are solved and new aspects are developed. For example: The true Christ lived 10.000 years earlier and the Christianity is in that case an indirect consequence of the downfall of Atlantis.

Inform yourself briefly on this homepage about the fantastic discoveries of Atlantis, its fall and thus connected mysteries in human history!
